## TRH8 series contactors

The TRHB series contactors (hereinafter referred to as contactors) are mainly suitable for circuits with AC 50Hz (or 60Hz), rated working voltage up to 400V, and rated working current up to 125A, controlling low inductance and micro inductive loads for household appliances and similar purposes; It can also be used to control the load of household electric motors, and the control power should be correspondingly reduced.

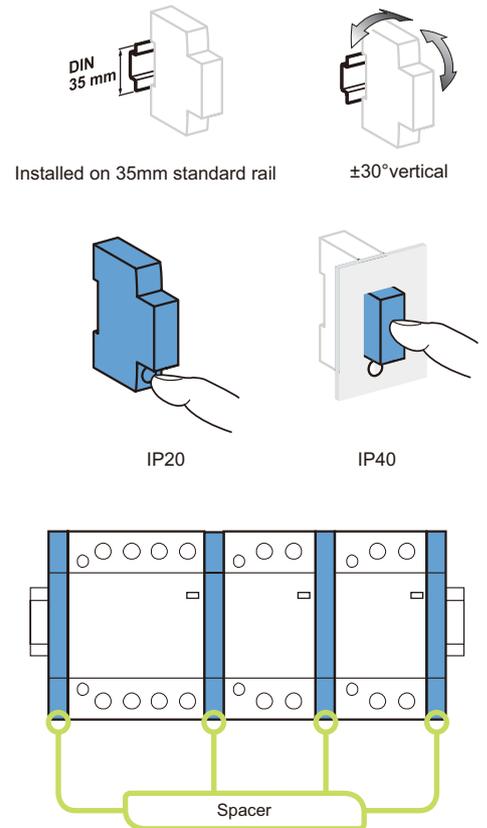

The product is applied in households, hotels, apartments and other places to achieve automation functions, and is applied in large-scale production of household appliances. Contactors comply with GB/T 17885, GB/T14048.4, IEC/EN61095, IEC/EN60947-4-1 standards  
The attachment complies with GB/T14048.5 and IEC/EN 60947-5-1 standards.
